

Lower Cost Alternatives to Solve
Your Air Quality Control Problem

FOR IMMEDIATE RELEASE

BUELL APC ACQUIRES AVC SPECIALISTS, INC.

LEBANON, PENNSYLVANIA, August 29, 2008. Buell APC, a Division of Fisher-Klosterman, Inc, a CECO Environmental Company (NASDAQ: CECE), a leading provider of air pollution control and industrial ventilation systems, recently announced that it has acquired AVC Specialists, Inc. of Moorpark, California.

Buell APC has provided over 50 years of innovative solutions for air pollution control and product recovery for power utility and industrial applications globally. The staff is highly disciplined in engineering applications, project management and field services including precipitator rebuilds, upgrades, precipitator casing conversion to fabric filter, and new pulse jet baghouses.

AVC Specialists is also a global supplier of precipitator parts and service including their advanced ESP voltage, rapper and supervisory control systems. For over 30 years, AVC Specialists has served the power, refining, petrochemical, pulp and paper, cement, and other process industries with ESP upgrade, repair and field technical services.

With AVC Specialists joining the Buell APC Team, Tom Lugar, Vice President Buell Division, and Tom Shideler, President of AVC Specialists state, "With the expanded capabilities to serve the Utility and Industrial Marketplace, Buell APC now provides truly 'One Stop Shopping' for all of a customer's Electrostatic Precipitator needs to include rebuilds and upgrades, new precipitators, inspection and repair services, voltage, rapper and supervisory control systems, field technical services, performance evaluations, and mechanical and electrical replacement parts for all OEM design ESPs. In fact, we will even stuff pulse jet bags into an ESP casing for an ESP to fabric filter conversion for the ultimate in total and fine particulate removal and high efficiency mercury capture with sorbent injection."

ABOUT CECO ENVIRONMENTAL

CECO Environmental Corp. is North America's largest independent air pollution control company. Through its ten subsidiaries -- Busch, CECOaire, CECO Filters, CECO Abatement Systems, kbd/Technic, Kirk & Blum, H.M. White, Inc., Effox, GMD Environmental and Fisher-Klosterman -- CECO provides a wide spectrum of air quality services and products including: industrial air filters, environmental maintenance, monitoring and management services, and air quality improvements systems. CECO is a full-service provider to the steel, military, aluminum, automotive, ethanol, aerospace, electric power, semiconductor, chemical, cement, metalworking, glass, foundry, and virtually all industrial process industries.
